

## Outline for April 8, 2004

1. What is the safety question?
  - a. An unauthorized state is one in which a generic right  $r$  could be leaked into an entry in the ACM that did not previously contain  $r$ . An initial state is safe for  $r$  if it cannot lead to a state in which  $r$  could be leaked.
  - b. Question: in a given arbitrary protection system, is safety decidable?
  - c. Mono-operational protection systems: decidable
  - d. Theorem: there is an algorithm that decides whether a given mono-operational system and initial state is safe for a given generic right.
2. General case: It is undecidable whether a given state of a given protection system is safe for a given generic right.
  - a. Represent TM as ACM; reduce halting problem to it
3. Take-Grant
  - a. Introduce as counterpoint to HRU result
  - b. Show symmetry
  - c. Show islands (maximal subject-only tg-connected subgraphs)
  - d. Show bridges (as a combination of terminal and initial spans)
4. Predicates
  - a.  $\text{can}\bullet\text{share}(r, \mathbf{x}, \mathbf{y}, G_0)$  iff there is an edge from  $\mathbf{x}$  to  $\mathbf{y}$  labelled  $r$  in  $G_0$ , or all of the following hold:
    - i. there is a vertex  $\mathbf{y}'$  with an edge from  $\mathbf{y}'$  to  $\mathbf{y}$  labelled  $r$ ;
    - ii. there is a subject  $\mathbf{y}''$  which terminally spans to  $\mathbf{y}'$ , or  $\mathbf{y}'' = \mathbf{y}'$ ;
    - iii. there is a subject  $\mathbf{x}'$  which initially spans to  $\mathbf{x}$ , or  $\mathbf{x}' = \mathbf{x}$ ; and
    - iv. there is a sequence of islands  $I_1, \dots, I_n$  connected by bridges for which  $\mathbf{x}'$  is in  $I_1$  and  $\mathbf{y}'$  is in  $I_n$ .
  - b. Go through interpretation
5. Schematic Protection Model
  - a. Model components
  - b. Link function
  - c. Filter function
  - d. Example: Take-Grant as an instance of SPM
  - e. Create operations and attenuation
6. Expressive power
  - a. HRU vs. SPM
  - b. Multiparent joint creates in HRU
  - c. Adding multiparent joint creates to SPM (giving ESPM)
