

Midterm Study Guide

This is simply a guide of topics that I consider important for the midterm. I don't promise to ask you about them all, or about any of these in particular; but I may very well ask you about any of these, as well as anything we discussed in class, in the discussion section, or that is in the readings (including the papers).

1. Fundamentals
 - a. What is security?
 - b. Basics of risk analysis
 - c. Relationship of security policy to security
 - d. Policy vs. mechanism
 - e. Assurance and security
2. Saltzer's and Schroeder's principles of secure design
3. Robust programming
4. Buffer overflows
5. Penetration studies
 - a. Flaw hypothesis methodology
6. Vulnerability models
 - a. RISOS
 - b. Program Analysis
 - c. NRL
 - d. Aslam
7. Access control matrix
 - a. Matrix
 - b. Primitive operations
 - c. Commands
 - d. Harrison-Ruzzo-Ullman result (undecidability of safety)
8. Policies
 - a. Mandatory access control (MAC)
 - b. Discretionary access control (DAC)
 - c. Originator-controlled access control (ORCON)
 - d. Role-based access control (RBAC)
9. Confidentiality Models
 - a. Bell-LaPadula Model
 - b. Lattices and the BLP Model
 - c. Tranquility
10. Integrity Models
 - a. Biba Model
