

# Lecture 28 Outline

November 28, 2016

**Reading:** §17\*

**Assignments:** Homework 5, due Dec. 2

---

1. General notes
  - a. Homework 5, question 2 has been corrected. Do *not* do the earlier version!
  - b. Lab 4 has been graded and returned (on Canvas). Please resubmit any changes by 11:59pm December 2 (on Friday). You can recover up to 80% of the points you lost for correctness and style.
2. Compiler-based mechanisms
  - a. Exceptions
  - b. Concurrency
3. Run-time mechanisms
  - a. Fenton's data mark machine
  - b. Variable variable classes
4. Tainting
5. Firewalls
